1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 35-38 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Reciting synergistic pain alleviating amounts of gabapentin and an NMDA receptor antagonist in a weight ratio of from 1:50 to 50:1 constitutes new matter. There does not appear to be any evidence disclosed in the specification of synergism between gabapentin and NMDA receptor antagonist. Nor is there a disclosure of the ratio of 1:50 to 50:1. Ratios of gabapentin : naproxen sodium of 1:1 and 50:1 are said to have synergistic action (page 9, lines 18-28. However this does not provide support for the limitations of claims 35-38.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 35-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Caruso et al US 6,187,338 B1. The claims are rejected for the reasons set forth in

Art Unit: 1615

Paper No. 7 mailed, May 28, 2003. Claim 2 shows a combination of gabapentin and an NMDA receptor antagonist. Claim 8 clearly shows methods for treating pain. Particular anticonvulsants in addition to gabapentin which include pregabalin are shown in column 2, lines 29-34.

Claims 35-41 are rejected.

Claims 1-34 have been canceled.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
